The new fantasy action RPG takes place in the Lands Between, where elven lords rule over the human kingdoms. The dwarves and humans of the Lands Between live in harmony with one another, but the elves are selfish and lazy. It is in this world that a Daedric artifact called the Elden Ring was born. The Elden Ring is a holy relic said to have been forged by Daedra, the deities of magic. When the elves of this world reached the final phase of their evolution, they decided to transform the lands they conquered into Daedric planes and began the Dark Pact. For these elves, the Elden Ring has become the ultimate power, and they wield it recklessly in order to conquer the entire world. The Land of the Elden Ring is a dark, bleak world. Its wind is perpetually bleak. It does not support life. The desolate lands, its people, and the Elden Ring itself combine to create a vision of hopelessness. The Lands Between are rich with life, but although the species live in harmony with one another, they are still divided into an elven ruling race, a race of dwarven warriors, and a race of human bakers and cooks. As these races interact with one another, they are torn apart by the savage conflict of this world. They have been made prisoners of the end of their empire. Most of the Lands Between's races have been converted to their Daedric planes. In this world of magic and violence, the races live in a time of constant turmoil, as elves and dwarves endlessly fight to retain their hold on the lands. With their power, they are willing to commit any sort of crime. "Competent fighting against the dwarves and elves will not ensure victory." The Elves and Dwarves of this world have the physical capacity to attack the humans and the aura of an elf, but do not use their speed and ability to fight without magic. The elves are forever dreaming and the dwarves are naturally ferocious. Neither race is reckless, and both are helpless in the face of the arcane power of the elves and dwarves. The humans live out their years in peace. They are protected from the brutality of the elves and dwarves, but all are forced to sell their wares as bakers, blacksmiths, miners, and cooks. They can neither defend themselves nor attack their enemies. The humans, dwarfs, and elves are not the only victims of the elves and dwarves. The world of Tarnished

What should I think about it? It's a typical fantasy RPG where the player is required to build their own character and then be guided to fight several kinds of monsters while exploring dungeons. Battles can be played in real-time or in an asynchronous time. Gameplay As we mentioned, the game is a typical fantasy RPG where the player is required to build their own character and then be guided to fight several kinds of monsters while exploring dungeons. Battles can be played in real-time or in an asynchronous time. What you can notice when playing is that it's a very simple game that you can easily play. First of all, the number of items to equip is limited because it's a typical RPG where you can equip a maximum of 10 items, but what it lacks is that there are no combos that can give you more than 10 extra power points which is really boring. The game itself is a typical role-playing game that gives you a lot of opportunities to explore a vast world full of variety. Although the basic story is simple and it requires you to follow the protagonist in order to find the monster that you need to defeat, it offers a lot of opportunity to explore, make the most of your environment, meet with interesting characters, and find out many things about the world. If you've been an RPG fan, you should definitely try this one. Graphics It's a typical role-playing game where you explore the world and the dungeons while using your own character, thus the graphics will always be a very important part of the game. The game offers a full version of the game with 16x9 and 4x3 resolution. In addition, the game includes a portrait of the protagonist, a 3D portrait, a "Mode Select" menu, a character editor, and save data support. There is no graphics that are amazing, but in the same way the animations in the game are also very important in order to create excitement, so we are really satisfied. It's a big table to play on, too, that full of people talking. You can hear things like, "I went in there and I came out of there with this. I went in there and there were so much people fighting," and "I went in there an there was a Tileset." Those tiles are you. Every inch of a room. Everyone can breath in a place of her own, and I'm the breath. I'll be passing. I'll be leaving. I'll be coming in and going."

Tarnished is still early in development, however, and you're still figuring out how exactly to breathe.

"If you look behind you, you see the emptiest room," he says. "It's an open room with a sign, ""Play here all you like,"" so everyone's playing. But no one is in here—because it doesn't have any motion right now."

He pauses, looks away, exhales, and looks back at me.

"When you play, it really works," he says. "It follows you and you really feel like you're moving through it all. But still, it's an empty room, and you can be anything you want to be."

"When you start the game," he says, "everyone opens up a new place where they just make it out of the world."
