Q: require login before rendering each component in routes/web.php I have a web app built on Laravel 4 that consists of multiple components (one of them being dashboard). I have a login component in app/frontend/components that checks the user login status. I want to have a login required on each of the following two routes: Route::get('/dashboard', 'Components\Dashboard\DashboardController@viewDashboard')
Route::get('/welcome', 'Components>Welcome>WelcomeController@viewWelcome')

How do I do this? A: First you have to add you login component in the web middleware.

```
protected $middleware =  
array('App\Http\Middleware\EncryptCookies'); Then  
create a middleware protected $routeMiddleware = array(  
'login' => 'App\Http\Middleware\Authenticate', 'welcome'  
=> 'App\Http\Middleware\Stack' ); And use the  
middleware on each route like this: Route::get('/dashboard',  
'Components\Dashboard\DashboardController@viewDash  
board')->middleware('authenticate');  
Route::get('/welcome', 'Components\Welcome\WelcomeC  
ontroller@viewWelcome')->middleware('authenticate'); If

Route::get('/dashboard', 'Components\Dashboard\Dashboar  
dController@viewDashboard')->middleware('

But in the three years since Fox canceled “Arrested” – which consisted of just eight of the show’s first 13 episodes – the fate of the character of Buster Bluth has remained uncertain. When it comes to “Arrested,” most

fans are willing to be patient – and have quietly assumed that the show would never return. Now that the actors have returned for the long-awaited fifth season of “Arrested Development,” the questions surrounding the potential of a “Arrested” movie are returning. “The answer is yes, the film is totally in the works,” said series co-creator Mitch Hurwitz in a recent interview. “They are almost done, so it should probably be shooting by the end of summer. They are officially working together now.” While Hurwitz wouldn’t divulge any details about the film’s progress, it appears to be something of a reunion. The first season of the series, which ran from 2003-06, starred the original cast of Will Arnett, Michael Cera, Jessica Walter, David Cross, Tony Hale and Jeffrey Tambor in various roles, while the second season had Jason Bateman and Will Arnett as the only returning characters. Later seasons utilized many of the original cast members. The feature film, “Arrested Development,” from 2005, reunited the main cast, though it was a critical flop and quickly written off.

There were many reasons for my resignation, including racist remarks, verbal abuse, and a baseless firing. Now the company wants me to go back. Could I legally assert that I was "dumped" from this

position without cause? A: No, you could not assert that you were "dumped" without cause. To be very blunt about it, "dumping" is a fairly regular term for "forced resignation" or "fired without cause". If you were not fired or not forced to resign, then you were "d
